

Achievements

Featured Work

Sheffield Digital Festival

My University Experiential Design project SYNC VR was presented at Sheffield Digital Festival by keynote speaker, Steve Gibson.

Portfolio Pick 2021

D&AD

I was selected this year as one of D&AD's Portfolio Picks, and my work was featured on the organisation's website.

Education

Interaction Design

Northumbria University

4 year course with a year spent working in industry, the course is incredibly broad but some of the topics we cover include:

App Design	80/100
Experiential Design	95/100
Personal Project Research	90/100
Personal Project Realisation	82/100
Professional Collaboration	85/100

Skills

UX Design	Animation
User Research	Games Development
Wireframing	Interaction Design
Prototyping	HTML / CSS
Usability Testing	C#

Software

Figma	Adobe Creative Suite
Sketch	After Effects
Linear	Unity
Jira	Cinema 4D
Miro	Blender

Attributes

I've always been a fast learner. I enjoy being introduced to new scenarios and potential challenges, it causes me to take new approaches and develop innovative solutions to problems. I love collaborative work and have found lots of success working in teams.

About

I'm James, a Product Designer based in Newcastle. I enjoy creating digital experiences, working with new exciting technologies, and creating the best experience for the end-user. I have an extremely broad skill-set, that has been built through my own curiosity and wanting to learn.

Experience

Product Designer 12/21 -

Bottlepay (Acquired by NYDIG)

I work within the app team of a rapidly growing financial services and bitcoin app. It's a very collaborative team with a big focus on UX and creating the best experience possible.

- Worked on a range of features for our consumer mobile app.
- Developed full app redesign.
- Supported sales teams with PoCs and interactive prototypes.
- Supported marketing with animated social content.

Product Designer 12/21 -

NYDIG

I work within the platform solutions team developing a range of solutions for large scale financial orgs in the U.S. NYDIG helps traditional financial institutions leverage the power of bitcoin.

- Worked with customers to design solutions for implementation.
- Created integration site to provide visuals for API integration.
- Designed multiple features for backend management platform.
- Created material for sales pitches and presentations.

UX/UI Artist 05/21 - 12/21

Ubisoft

I worked on a new VR Assassin's Creed game. I was based within the HUD team designing assets that the player will see in game.

Associate Digital Designer 08/20 - 05/21

KOMODO Digital

I worked in an agile design team, developing digital products for many different businesses and industries.

UX Designer 06/19 - 07/20

HiveHR

Developed multiple new features for an employee engagement app with over 200,000 users.

Events

EMEA / Facebook Design Summit

An invitational event to gain insight into the lives of Facebook designers based all over the world, as well as portfolio critiques.

Facebook Design Jam

Designed an experience to provide a user with better control and transparency for their data, and then presented this concept to peers and Facebook staff.

Atombank Hackathon

A 3 day hackathon, we developed an interactive prototype to help improve family saving habits and presented the concept to over 100 industry experts.
